WORK EXPERIENCES

2018 - Present

Frog

Munich - DE

Frog is a leading global design and strategy consultancy. As a design technologist I was mainly in charge of front end development and my responsibilities included:

- Writing modern, performant maintainable code for a diverse array of clients.
- Working in, and sometime leading, teams either small (3) or big (20+) using Agile methodologies.
- Enforcing best practices on both design and development and filling the communication gap between the two teams.
- Informing the design team of opportunities and limitations of the tech stack.
- Prototyping tools and web applications for design research purposes.

2015 - 2018

Arduino

Turin - IT / Malmo - SE

Arduino is an open-source electronics platform. As a design technologist my responsibilities included:

- Research and Development for the project Casa Jasmina.
- Designing and prototyping smart home appliances using open source software and hardware.
- Beta testing new products and producing tutorials and documentation.
- Leading workshops and teaching in universities as well as private companies.
- Maintaining and expanding the existing company website.
